

University of Bristol
Infection and Immunity Symposium 2012
“Imaging in Infection and Immunity Research”
Wednesday 18th April
1 pm, Medical Sciences Building

- Facundo Batista (CRUK)** “Dynamic imaging of lymphocyte activation - from single molecule to living tissue”
- Wolf Hardt (Zurich, CH)** “*Salmonella* diarrhoea: mechanistic insights from high content image-based screening and real time microscopy”
- Bram Koster (Leiden, NL)** “Correlative light electron microscopy method developments and their application in pathogen research”
- Manfred Rohde (HZI, D)** “The “in and out” of streptococci as visualized by light and electron microscopy”
- Abigail Woodfin (QMUL)** “Imaging leukocyte extravasation dynamics *in vivo*”
- Alice Brown (Imperial)** “Super-resolution imaging of the natural killer cell immune synapse”
