

The Bristol Centre for Nanoscience and Quantum Information: A Research Centre for new opportunities.

The Bristol Centre for Nanoscience and Quantum Information (NSQI) provides state-of-the-art specialised laboratories whose vibration and acoustic noise levels are amongst the lowest achieved anywhere world-wide. It also has a unique purpose-designed environment in which a multi-disciplinary and inter-disciplinary research community drawn from science, engineering, and medicine can be fostered and thrive through stimulating interactions and the exchange of ideas.

This lecture will inform the public about the special features of the Centre specially designed to host research in Nanoscience and Quantum Information and about the breakthrough research that is being carried out at present.

Dates: Friday 28 May, Tuesday 15 June and Tuesday 14 September 2010

Programme:

- 6:00 pm: Arrival and coffee
- 6:15 pm: Lecture
- 6:45 pm: Virtual tour of the Centre
- 7:00 pm: Finish

Venue: Centre for Nanoscience and Quantum Information, Tyndall Avenue, Bristol BS8 1FD.

Admission: Free but booking is required in advance. Contact Diane Thorne, tel: +44 (0) 117 331 8318 or email: diane.thorne@bristol.ac.uk.
