

Academic Sandpit Meeting

The meeting will be chaired by Professor Andrew Long of Nottingham University (Director of the EPSRC Centre for Innovative Manufacture in Composites) and will be held at the National Composites Centre Bristol on Wednesday 4th of April from 10.00

The aims of the meeting are:

- To feed back to interested academic parties the status of the NCC's activity to date, especially the Year 1 NCC Core Research Programme
- To identify potential research targets for the Year 2 NCC Core Research Programme from the academic community
- To identify potential academic support for the NCC Core Research Programme
- To start to build mutually supportive relationships between academia and the NCC

There will be an opportunity for attendees to take a tour of the NCC facilities during the day if they wish

To register your interest in attending this meeting please contact composites-centre@bristol.ac.uk and you will be sent further details of the event including details of how to put forward your own ideas for consideration as part of the Year 2 Core Research programme.
