

School of Biochemistry Seminar Series

Autumn Term 2018/2019

Seminars are held on Thursdays at 1pm in C42, Biomedical Sciences Building, except for the Colloquium, which will be held in E29 at 4pm

- 4th October **Dr Katrin Rittinger** – The Francis Crick Institute
Linear ubiquitin chains: function, mechanism and inhibition
Hosted by Christiane Berger-Schaffitzel
- 11th October
Colloquium
4pm, E29 **Professor Laurence Pearl FRS FMedSci** – University of Sussex
Phosphorylation-dependent assembly of the DNA damage response
Hosted by Imre Berger; Followed by wine reception outside E29
- 18th October **Dr Chris Pudney** – University of Bath
Towards real-time sensing of pathogens and recreational drugs using spectral fingerprinting and artificial intelligence
Hosted by Ross Anderson
- 25th October **Professor Guido Serini** – Istituto Di Candiolo-IRCCS, Italy
Semaphorin dependent and independent Neuropilin-1 signaling: implications for vascular morphogenesis and function
Hosted by Harry Mellor
- 1st November **Dr Imogen Sparks** – School of Biological Sciences, Bristol
Organelle dynamics: tales of motors and tethers
Hosted by David Stephens
- 8th November **Dr Sarah Mclelland** – Queen Mary University of London
Focus on the individual: The importance of chromosome-specific biology in generating aneuploidy patterns in cancer
Hosted by Binyam Mogessie
- 15th November **Dr Phillip Stansfeld** – University of Oxford
Biogenesis pathways in the bacterial cell envelope
Hosted by Ian Collinson
- 22nd November **Dr Yanlan Mao** – LMCB, UCL
Coping with mechanical stress: Tissue dynamics in development and repair
Hosted by Helen Weavers
- 29th November **Dr Lucy Collinson** – The Francis Crick Institute
Correlative microscopy and the big data challenge
Hosted by Paul Verkade
