

School of Biochemistry Seminar Series

Summer Term 2018/2019

Seminars are held on Thursdays at 1pm in C42, Biomedical Sciences Building, except for the seminar on June 20th, which will be at 2pm in C42

- 2nd May **Professor Thomas Schalch** – University of Leicester
Towards atomic resolution understanding of the *S. pombe* heterochromatin machinery
Hosted by Imre Berger
- 9th May **Dr Beth Bromley** – University of Durham
Design and characterisation of biomimetic peptoids for anti-microbial applications
Hosted by Dek Woolfson
- 16th May **Professor Jo Morris** – University of Birmingham
BRCA1 in DNA replication and repair
Hosted by Anna Chambers
- 23rd May **Dr Bernadette Carroll** – VC Fellow, Biochemistry, Bristol
Rewiring of mTORC1-autophagy pathways in senescence
Hosted by Kate Nobes
- 30th May **Professor John McGeehan** – University of Portsmouth
Discovery and engineering of enzymes for deconstructing plastics
Hosted by Leo Brady
- 6th June **Professor Anthony Wilkinson** – University of York
Sensing and switching in bacterial differentiation
Hosted by Ian Collinson
- 13th June **Dr Deborah Goberdhan** – Oxford University
TORCing with exosomes: the endosomal language of intercellular persuasion
Hosted by Bernadette Carroll
- 20th June, 2pm **Professor Sandra Blaess** – University of Bonn
Developmental mechanisms that establish neuronal diversity in the dopaminergic system
Hosted by Andrea Brancaccio
