

***Applications are
invited for PhDs in
Catalysis***

The EPSRC funded Centre for Doctoral Training (CDT) in Catalysis is recruiting high quality applicants for training towards a PhD.

Based in the three centres of Bath, Bristol and Cardiff, and working closely with UK industry, a PhD at the Catalysis CDT is a 4 year course that offers an unparalleled opportunity to conduct cutting edge research in all areas of catalysis from theory to engineering. During your first year, you will spend time at all three universities, before deciding on which area of catalytic chemistry or engineering to specialise in during your research project.

For further information about the Catalysis CDT contact:
Ms Sarah Warner
Email: WarnerSL@cardiff.ac.uk Tel: 02920874059

Applications for studying at the Catalysis CDT can be made via the CDT webpage at <http://www.cardiff.ac.uk/cci/>
