this image.

such an occurrence among the first time that scientists have witnessed visiting the afar Rift in Ethiopia in November 2010. Pictures from an eruption were among a group of scientists from Bristol who went on a field trip to the Rift Valley in order to create a visual database of Great White sharks. The team was able to recognize and archive the features of the sharks’ dorsal fins (which are as unique as fingerprints) helping researchers to track individual species.

Giving wind power a spin

A team of staff and students from the Faculty of Engineering met two weeks ago on the campus to present the Bristol partner in the world’s leading student- and company-owned wind-powered vehicle to complete the course under an electric vehicle.

Tiny blooms

Antirrhinum majus, the world’s most common flowering plant, from the University’s Botanic Garden – only a tiny handful of garden varieties is able to grow the plant successfully. Pictured is the male flower.

February

Robotics Lab wins World Cup hosting bid

A new agreement that the Bristol Robotics Lab join a collaboration between the universities of Bristol and the University of Bath will allow the UK to debut at the FIRA RoboWorld Cup 2012, featuring the world’s most advanced autonomous robots. Alongside this, a major scientific conference, “Frontiers in Robotics and Automation” will be held at the Bristol Robotics Laboratory, bringing together the world’s leading researchers in robotics.

March

Brand graduate scoops Oscar

Andrew Romano, a 1998 graduate of the Department of Drama: Theatre, Film and Television, won an Academy Award for his short animated film, The Lost Thing, directed by Shaun Tan, who co-directed.

April

Bristol pupils go Olympic

London 2012 Olympic mascots Wenlock and Mandeville welcomed over 1,300 Bristol school families to the 2011 Bristol Festival of School Sport and Culture. During the intense week, Bristol’s famous Olympic athletes got the opportunity to inspire the city’s future sporting stars.

May

Dylan’s back pages

The Department of English hosted a conference to reflect on the career and work of Bob Dylan on the occasion of his 70th birthday. The event was attended by the UK’s foremost Dylan scholars and attracted considerable media attention.

2010/11 The year in pictures

August

Fire and fingerprints

Dr Til Bjurhammar from the Department of Computer Science launched a collaborative project with the White Elephants Trust to build a visual database of Great White sharks. The team was able to recognize and archive the features of the sharks’ dorsal fins (which are as unique as fingerprints) helping researchers to track individual species.

September

Gives 3D printing a spin

A team of staff and students from the Faculty of Engineering met two weeks ago on the campus to present the Bristol partner in the world’s leading student- and company-owned wind-powered vehicle to complete the course under an electric vehicle.
